

Tree Committee Meeting  
Tuesday, February 11, 2014  
6:30 p.m.

1. Spring plantings:

- had advanced 47 potential ROW plantings anticipating a number of demurrals. Actually received only four.
- Conn. Ave. Have now planted about 1/3 of the potential sites. perhaps another 10 -12 this spring. Would suggest continuing with large trees on west side. Preferred species??
- parks. Nothing planned pending approval of five year plans.

2. Village policies re trees on private property

- scale of take down activity as a result of TOB and administrative action.
- policies and practices of neighboring jurisdictions (Dr. Feather) to promote good tree management by private owners
- potential hazards of poorly maintained trees
- potential interest in inventorying private CCV tree stock or otherwise gauging status of Village canopy
- potential incentives for planting trees, especially where there have been take downs approved administratively

3. Pruning

- by Pepco
- by Village for safety and to maintain tree health and form

4. 2015 proposed tree budgets - essentially a continuation of FY '14 numbers, which I will have available FYI at the meeting.
